Our Philosophy

Each project is unique with very specific goals and measures; you can expect the exact same from our approach. Whether your project is large or small, new or refreshed, MyPorter has a service or solution for you. We execute projects with quality and integrity – on time and on budget.

CORE OFFERINGS:

Flexible Terms and Speed to Contract

At MyPorter, we believe in flexibility. Month to month or fixed contracts, we can come up with a temporary or long-term program to help you complete your fulfillment and distribution projects.

Turn-Key Atlanta Manufacturing Logistics Solutions

MyPorter is far from just dead storage. All of the following are available (a la carte) for your needs:

- Inventory Management and Control (FIFO & FILO)
- Pick, Pack, Ship
- Shipping / Receiving of Palletized or Floor-Loaded containers
- Cross-Docking
- Atlanta Satellite Manufacturing Fulfillment & Distribution
- Capacity Augmentation

Atlanta Parts Forward Stocking and Final Mile Delivery

MyPorter's Atlanta distribution centers are within 20 minutes of city-center. For sensitive product that must be delivered quickly, MyPorter can serve as a forward stocking, satellite fulfillment and distribution center in Atlanta to reduce delivery times to end customers. With our dedicated fleet of 26 foot box trucks, we can also complete white glove delivery services.

Seasonal Atlanta Manufacturing Distribution Projects

We get it, you're running 95% capacity all year and busy season is right around the corner. You need a partner who is capable of more than just inventory overflow storage, you need a full Atlanta logistics partner. We can offer project-based and on-going proposal options.

CASE IN POINT

National HVAC Contractor Use MyPorter for Parts and Raw Materials Storage and Distribution in Atlanta GA

The Challenge

A national HVAC contractor purchased a large quantity of finished product (condensers) and raw materials (copper) from China in advance of a large multi-family development project in Atlanta GA. He needed the items categorized by SKU, storage for six months, and a phased delivery scheduled to their customer's site as the items and materials were needed.

How we Helped

To proactively address these issues, MyPorter invited the client on-site to discuss the cadence and details. Working with the CEO of the HVAC contractor (our client) MyPorter delivered a flexible solution that accurately measured month storage pricing based on reduction in inventory levels and a flat, easily understood fee for delivery. A simple pricing structure was created for storage, handling services for inbound / outbound, exception management (e.g., pallet re-stacking, shrink wrapping), and full suite of technology visibility and reporting services using the MyPorter technology stack.

Results

The project went extremely smoothly with the construction site getting the correct parts and raw materials at precisely the right time, resulting in a well-run operation and secure storage for highly valuable inventory and no leakage. The client is gearing up to use MyPorter on another project in the Atlanta area.

"Without MyPorter managing the local logistics on the ground, we wouldn't have been able to get this done" - CEO, National HVAC Contractor
